- Angular
- Postgres
- GIT
- CSS
- HTML
- Rest API
- PHP
- MySQL
- C#
- C++
- .NET
- Mongo DB

---

## EDUCATION

---

**FRANKLIN UNIVERSITY [AUGUST 2015 – JUNE 2019 (EXPECTED)]**  
Currently attending to complete a bachelor's degree in Computer Science (software development). Coursework has covered various languages, web design, professionalism, networking, technical writing, math, algorithms, testing, code development, and efficiency. I have 6 classes left until completion.

**UDACITY [2016 - CURRENT]**  
Completing a nanodegree in mobile web development through Udacity. Topics cover having application cache, so they load faster and can be available offline or in bad service areas using local storage and service workers. Reactive design using CSS. ES6 in JavaScript, and full-stack development.

**WOMENS COHORT [FALL 2017]**  
Participated in an all-women's cohort at Bitwise to complete a full stack application that would help people find the resources they needed in dire times.

---

## WORK EXPERIENCE

---

**BITWISE: COHORT [FEBRUARY 2018 - CURRENT]**  
Completing feature requests and updating a software product to be introduced as software service. Technologies used are 2-8 in the skills list to the left.

**GEEKWISE: COTEACHER [FEBRUARY 2018 - CURRENT]**  
Teaching twenty percent of the time. Assisting with questions, creating presentations, and handouts for later reference. Responding to students' questions outside of class.

**BEST BUY: GEEKSQUAD CUSTOMER AGENT [AUGUST 2013 - PRESENT]**  
Assisted customers with troubleshooting, shipping, receiving, and repair of their products. Certified returned products for re-sale. As a project team member, I unboxed the latest and greatest things throughout the store, and displayed them for clients and coworkers to try out. Also worked in various sales areas where I presented the client with full solutions that were custom to their needs.
